📍 Chennai

Senior Software Engineer with 2.5 years of experience specializing in frontend development using React and Angular. Skilled in building dynamic, high-performance web applications with a strong focus on clean code and responsive design. Experienced with C#, Docusaurus for documentation, and SQL for database management. Passionate about delivering robust solutions in Agile environments and continuously improving processes through collaboration.

## Experience

### Senior Software Engineer

Psiog Digital - Chennai

2024 Jun - Present

- Leading the application documentation using Docusaurus
- Mentoring and Leading team members, guiding them through the development process, conducting code reviews, and ensuring the quality of their work met project standards.
- Acting as a primary point of contact for clients, gathering detailed requirements and working with them frequently to ensure expectations were met.
- Balanced ongoing development activities with leadership responsibilities, contributing directly to new feature implementations in both the documentation app and SaaS platform
- Worked on several POCs (such as Virtualization, React Charts, etc.) to enhance the user experience of the SaaS application, focusing on features aimed at making the app more user-friendly and efficient.
- Overseeing the QA process and pitching in when necessary to assist with testing and bug resolution.

### Software Engineer

Psiog Digital - Chennai

2023 Jan - 2024 Jun

- Developed a custom documentation application from scratch using Docusaurus and deployed it on AWS Amplify
- Developed major features and requirements of a cloud-based SaaS application that provided both infrastructure and software as services, ensuring high availability and scalability.
- Utilized React for frontend development, creating dynamic and responsive UI components for both SaaS and documentation applications.
- Replicated Figma designs into responsive UIs for both the SaaS app and a custom documentation application. Ensured consistent design implementation across multiple devices and browsers
- Managed source code using GitHub, implementing version control strategies and CI/CD pipelines for smooth deployment, collaboration and ensuring adherence to the best practices.
- Collaborated closely with the client team to understand requirements and deliver features on time, while ensuring the applications' performance and scalability.

### Graduate Engineering Trainee

Psiog Digital - Chennai

2022 Jun - 2023 Jan

- Created template web applications by mimicking popular websites to create boiler plates .
- Built an E-commerce site using Angular from scratch, improving frontend skills and understanding of modern web development techniques
- Built and maintained several REST APIs using C# and integrated them into Angular applications for dynamic, real-time data handling.

## Education

### Vellore Institute of Technology

2017 Jun - 2022 Apr

- M.TECH Integrated Software Engineering
- GPA: 8.38

## Skills

- **Frontend:** React, Angular, JavaScript, HTML5, CSS3
- **Backend:** C#, .NET Core, RESTful APIs
- **Database:** SQL
- **Tools & Platforms:** Docusaurus, GitHub, VS Code, Figma
- **Version Control:** GitHub
- **Cloud Platforms:** AWS
